PREFACE

This publication is the sixth annual supplement to the original bibliography which was issued in June, 1967.

The annual supplement consists of citations of documents relating to planetary quarantine; many, but not all, refer to work supported by the Planetary Quarantine Office, Planetary Programs, National Aeronautics and Space Administration, Washington, D.C. The citations are assembled to bring up to date the survey of the current literature in the field. As in previous supplements there is a listing of documents published prior to the current reporting year. These are cited because of their substantive or historic value to the planetary quarantine program.

In certain references, numerals preceded by the letter(s) A, AD, N, X, NASA-CR, NASA-SP, or NASA-TM-X are given parenthetically as part of the citation. These numbers are to assist in the procurement of the document. Those carrying "A" numbers are obtainable, for a fee, from the

American Institute of Aeronautics and Astronautics, Inc.
Technical Information Service
750 Third Avenue
New York, New York 10017

Documents with "N," "NASA-CR," and "NASA-TM-X" numbers are available, at set rates, from the
National Technical Information Service
U.S. Department of Commerce
5285 Port Royal Road
Springfield, Virginia 22151

"NASA-SP" coded documents are obtainable from the
Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

"X" numbered documents are limited in their distribution to NASA associated or contractor personnel.

"AD" coded documents are generally available from the
Defense Documentation Center
Cameron Station
Alexandria, Virginia 22314

In this supplement the availability of a microfiche of the cited document is indicated by the use of the symbol # following the reference number. In each case the fiche is available from the same source as the hard copy document.

TEXTS

Books, cited in this supplement, containing scientific material germane to planetary quarantine problems.

Developments in Industrial Microbiology. Murray, E.D., editor. Washington, D.C., American Institute of Biological Sciences. 1971.

Disinfection, Sterilization and Preservation. Lawrence, C.A. and S.S. Block, editors. Philadelphia, Lea and Febiger. 1968.

Life Sciences and Space Research. Vishniac, W., editor. Berlin, Akademie-Verlag. 1972.

idem, Amsterdam, The Netherlands, North-Holland Publishing Co. 1972.

Methods in Microbiology, Vol. I. Norris, J.R., and D.W. Ribbons, editors. New York, Academic Press. 1969.

Progress in Industrial Microbiology. Hockenhull, D.J.D., editor. London, Churchill Livingstone. 1971.

Sterilization. Kirk-Othmer Encyclopedia of Chemical Technology. 1969.

Theory and Experiment in Exobiology. Vol. I. Schwartz, A.W., editor. Groningen, The Netherlands, Wolters-Noordhoff. 1971.

PROCEEDINGS PUBLISHING
PLANETARY QUARANTINE RELATED PAPERS

An alphabetical list of proceedings in which papers germane to planetary quarantine and cited in this supplement have appeared.

American Institute of Aeronautics and Astronautics, "Stepping Stones to Mars" Meeting, Baltimore, 1966.

American Institute of Biological Sciences, Planetary Quarantine Committee, Cape Kennedy, 1968.

American Rocket Society Missile and Space Vehicle Testing Conference, Los Angeles, 1961.

COSPAR, 13th Plenary Meeting of Working Group V, Leningrad, USSR, 1970.

Franklin Institute Research Laboratories, 6th Symposium on Electroexplosive Devices, Philadelphia, 1969.

Institute of Electrical and Electronic Engineers, 10th Annual IEEE Region 3 Convention, Knoxville, Tenn., 1972.

National Aeronautics and Space Administration National Conference on Spacecraft Sterilization Technology, Pasadena, 1965.
